

Singh, Gurjeet  
Sales Prediction and Forecasting - Wine Sales  
Stand-Alone R Program Instructions

Please use this as a guide to run the Stand-Alone Program against your data.

1. Import the file in R. Use the name "wine\_test"
2. Copy and paste the "Stand-Alone R Program" code into the R Script.
3. Run each section in the code.
  - a. 1 - Importing a Test File and check import
  - b. 2 - DATA PREPARATION
  - c. 3 - MODEL Deployment
  - d. 4 - Output File
4. Your final P\_TARGET will be saved in the R object called "FINAL\_Submission" with the INDEX column.
  - a. Note, there are two commands to create two CSVs. One for P\_TARGET in integer values and one in decimal values.
5. Once you complete running the last line of the code, you will see a new CSV file in your working directory. By default, this file is named as  
"Singh\_Gurjeet\_Wine\_Sales\_Test\_Score\_IntegerValues.csv" and  
"Singh\_Gurjeet\_Wine\_Sales\_Test\_Score\_DecimalValues.csv"
